

Applications are invited for **Post-Doctoral Positions** to work in the **Esteve-ICIQ Joint Unit** at the **Institute of Chemical Research of Catalonia (ICIQ)**, Tarragona.

The **Esteve-ICIQ Joint Unit** is a collaborative research project between the Spanish pharmaceutical company **ESTEVE** and ICIQ, dedicated to the development of new chemical processes and generation of medicinal chemistry libraries for drug discovery projects.

We are looking for candidates with a PhD degree in organic chemistry with significant experience in organic synthesis. The position will be focused on developing and optimizing reaction conditions, synthesis and purification of compound libraries. The candidate is expected to be familiar with general analytical tools (NMR, HPLC, etc.), and be a motivated team player.

Applicants should send their CV and a cover letter motivating their interest in the position to fcuevas@iciq.es indicating the reference EIJU.

The selected candidate is expected to start in January of 2014.

The position is initially for 1 year with the possibility of extension depending on performance. All the information relative to applicants will be treated confidentially.
