

SCHOOL OF CHEMICAL SCIENCES

SENIOR POST DOCTORAL RESEARCH ASSOCIATE • Ref: RA1027

£30,728 to £36,661 per annum

Applications are invited for a Senior Post Doctoral Research Associate in the group of Dr María Paz Muñoz at the School of Chemistry of the University of East Anglia, to work in an EPSRC funded project in the area of catalysis and mechanistic studies.

The successful candidate will be involved in mechanistic investigations on the platinum-catalysed reaction of allenes with nucleophiles. Experience in organometallic chemistry is essential, and knowledge or strong interest in mechanistic investigations is desirable.

The candidate must have a PhD in Chemistry and be able to fulfil all the essential elements of the person specification. This full time post is available from January 2014 for a period of 12 months.

Closing date: 12 noon on 15 January 2014

Further particulars and an application form are available on our website: www.uea.ac.uk/hr/jobs/ or Tel. 01603 593493.
